**Subject:** Resuspension and Load Standard

---

Ann & John,

On November 22 we shared with GE our position on the resuspension and load standards. On November 24 Ann phoned me with GE's counter-proposal, which we have given careful consideration. We continue to believe that the approach we shared on November 22 is appropriate. As agreed, I am attaching a document that sets out how and where the specified levels would be applied.

- Walter
